# **Energy performance certificate (EPC)**

Property type		Semi-detach	ned house
D14 3UJ		Certificate number:	4820-9521-0021-2104-0483
156 North Road BELFAST BT4 3DJ	Energy rating	Valid until:	12 February 2034

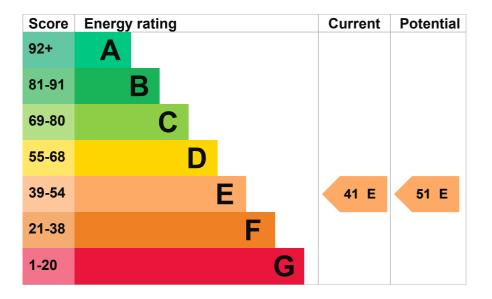

**Total floor area** 

154 square metres

### **Energy rating and score**

This property's energy rating is E. It has the potential to be E.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in Northern Ireland:

- the average energy rating is D
- the average energy score is 60

### Breakdown of property's energy performance

#### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Description	Rating
Solid brick, as built, no insulation (assumed)	Poor
Cavity wall, as built, insulated (assumed)	Good
Roof room(s), ceiling insulated	Very poor
Pitched, 200 mm loft insulation	Good
Fully double glazed	Average
Boiler and radiators, oil	Average
Programmer, room thermostat and TRVs	Good
From main system	Average
Low energy lighting in 74% of fixed outlets	Very good
Suspended, no insulation (assumed)	N/A
Solid, no insulation (assumed)	N/A
Solid, insulated (assumed)	N/A
Room heaters, dual fuel (mineral and wood)	N/A
	Solid brick, as built, no insulation (assumed) Cavity wall, as built, insulated (assumed) Roof room(s), ceiling insulated Pitched, 200 mm loft insulation Fully double glazed Boiler and radiators, oil Programmer, room thermostat and TRVs From main system Low energy lighting in 74% of fixed outlets Suspended, no insulation (assumed) Solid, no insulation (assumed)

#### Primary energy use

The primary energy use for this property per year is 271 kilowatt hours per square metre (kWh/m2).

#### About primary energy use

## How this affects your energy bills

An average household would need to spend £3,110 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £508 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2024** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

### Impact on the environment

This property's environmental impact rating is F. It has the potential to be E.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

#### **Carbon emissions**

An average household produces	6 tonnes of CO2
This property produces	10.6 tonnes of CO2
This property's potential production	8.8 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

## Changes you could make

Do I need to follow these steps in order?

### Step 1: Room-in-roof insulation

Typical installation cost	£1,500 - £2,700
Typical yearly saving	£395
Potential rating after completing step 1	49 E

#### Step 2: Floor insulation (suspended floor)

Typical installation cost	£800 - £1,200
Typical yearly saving	£113
Potential rating after completing steps 1 and 2	51 E

#### Step 3: Solar water heating

Typical installation cost	£4,000 - £6,000
Typical yearly saving	£89
Potential rating after completing steps 1 to 3	53 E

### Step 4: Internal or external wall insulation

Typical installation cost	£4,000 - £14,000
Typical yearly saving	£433
Potential rating after completing steps 1 to 4	62 D

#### Step 5: Solar photovoltaic panels, 2.5 kWp

Typical installation cost	£3,500 - £5,500
Typical yearly saving	£641
Potential rating after completing steps 1 to 5	68 D

### Help paying for energy improvements

You might be able to get a grant from the Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

## Who to contact about this certificate

#### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Ciaran Stuart
Telephone	07764612066
Email	info@spsni.com

#### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Quidos Limited
Assessor's ID	QUID208899
Telephone	01225 667 570
Email	info@quidos.co.uk

#### About this assessment

Assessor's declaration	No related party
Date of assessment	12 February 2024
Date of certificate	13 February 2024
Type of assessment	► <u>RdSAP</u>

### Other certificates for this property

If you are aware of previous certificates for this property and they are not listed here, please contact us at <u>dluhc.digital-services@levellingup.gov.uk</u> or call our helpdesk on 020 3829 0748 (Monday to Friday, 9am to 5pm).

There are no related certificates for this property.
